# Who are we?

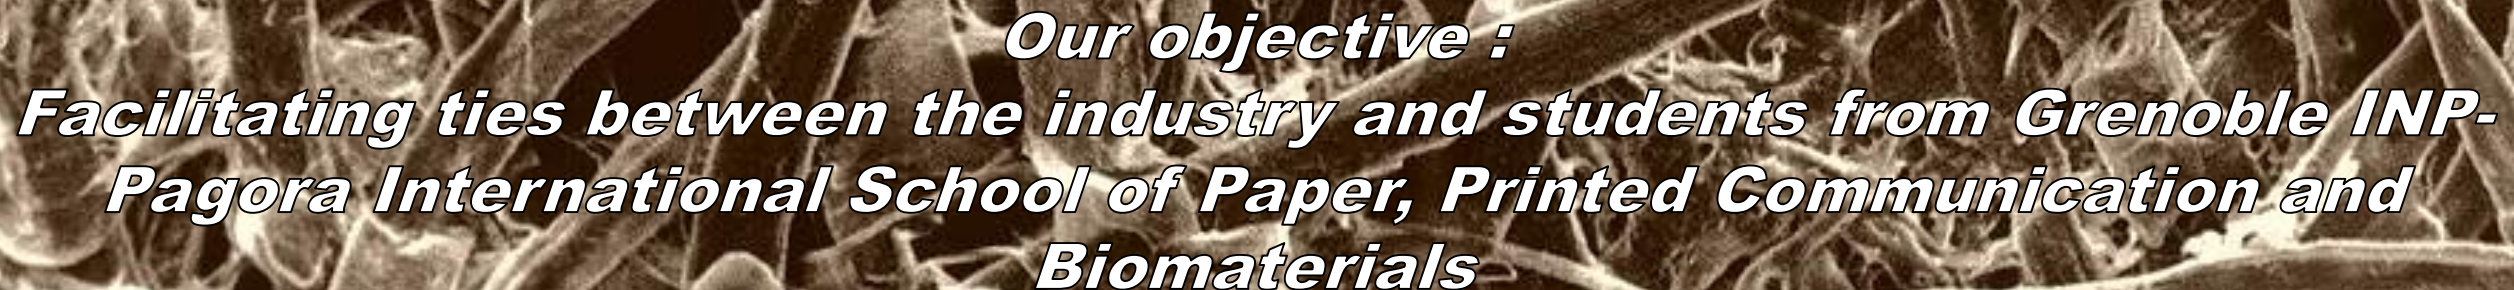

The Grenoble INP-Pagora TAPPI Student Chapter's association, founded in 2001, brings together paper-making engineering students to enable its members and its collaborators to promote their sector of activity and to exchange ideas with other TAPPI chapters and manufacturers from around the world.

TAPPI (Technical Association of the Pulp and Paper Industry) is an organization created in 1915 with a strong network of members who are specialized in the fields of biomaterials, paper, packaging and related industries.

The TAPPI student chapters are an excellent way to exchange with student members, as well as interact with our future employers, experienced members among the industry and participate in technical programs.

**Thanks to your donations, we can offer you :**

- Grenoble INP-Pagora's expertise and programs
- A direct link with students (recruitment of trainees, apprentices, engineers ...)
- The development of an international network between the TAPPI student chapters and the industry
- An international visibility
- Reviews of learning expeditions and/or conferences

***Our objective :***  
***Facilitating ties between the industry and students from Grenoble INP-Pagora International School of Paper, Printed Communication and Biomaterials***
